

# ***DLR Major upgrade & Reliability Enhancement***

***Introduction of new Signalling system and new rolling stock to the network whilst maintaining the existing fleet and passenger service***

As part of the major overhaul of the network and system upgrade the following activities were undertaken as part of the consultancy group Brown & Root Booz Allen Hamilton Group.

- Reliability enhancement program of the network including rolling stock & signaling system
- Rolling stock performance verification and upgrades for faster and more frequent service.
- Power system requirement and maintenance program evaluation.
- Safety assessment of the rolling stock sub system
